

CAG for 2027 – Project Description Template

The project description may include no more than three figures, tables, or illustrations.

CAG vision

State the long-term CAG vision in a few lines, including which challenge in the health services the CAG aims to improve.

[Up to 1000 characters including spaces]

Unmet need

- Describe the health challenge that the CAG is a response to.
- How many people are affected or at risk?
- Why is this of particular regional importance?
- Burden for society, financially, significance for absence on the labor market and so on?
- Why has it not yet been solved?

[Up to 3000 characters including spaces]

Scientific approach

- Describe what you aim to achieve together as a CAG and how.
- Describe the main research projects and work packages:
 - What are the overall objectives, questions and hypothesis?
 - What are the main research strategies and scientific methods?
 - What are the main methodological challenges?
 - How will you ensure the feasibility of the project?
- How will the key members and other associated experts contribute to the scientific work?
- How will you secure implementation of your results?
- Explain any ethical issues for the planned activity and how they should be handled. If there are no ethical issues, this must be stated clearly.
- How will users/patients be involved in planning and execution of the scientific work?

[Up to 15000 characters including spaces]

Consolidation

- Describe the plan for consolidating the CAG for at least the first three years.
- The following must be included:
 - Planned activities – overview, not in detail

- Simple time schedule and milestones can be included. The activity plan must be entered in eSøknad.
- Describe the success criteria for the CAG and how these can be measured

[Up to 4000 characters including spaces]

Impact and outcome

How do you intend to create value and how will you make impact on patient treatment, healthcare, education, training, innovation and society?

- How will the patients benefit?
- How will the healthcare system benefit?
- How can the clinical outcome be measured / quantified?
- What will be added to the research area?
- How will the knowledge that emerges from the CAG be disseminated:
 - in academic education activities (which programs and level)
 - in patient education
 - in the professional training area (which professions)
 - to the public in general
- How can results from the CAG activity result in innovation and business development?
- How will the society in general benefit – economical and socially?

[Up to 6000 characters including spaces]

CAG governance and funding

Describe the organization and decision structure, including the collaboration with relevant leaders in the hospitals, municipal healthcare (if applicable), and at the universities and/or colleges.

- How do you intend to balance the different perspectives and interests of the various CAG partners?
- How will you make sure that the various members and competencies in the CAG work together?
- How will you ensure a good collaboration with the clinical environments and the municipal health care system (if applicable)?

[Up to 3000 characters including spaces]

External funding

Describe how you will attract and secure external funding for the CAG.

Specify the financing sources and amounts for ongoing projects that are part of the CAG - and to estimate planned applications for external funding of the CAG.

[Up to 1000 characters including spaces]

Access to essential infrastructure and resources

Describe your access to essential infrastructure and resources.

[Up to 1000 characters including spaces]

Text field in eSøknad

CAG leader and Co-leader

Indicate who the chairperson and the deputy chairperson are. Only state name and institutional affiliation. Any additional information should be entered into the participant list.

CAG members

State the total number of CAG members (leaders + key members + associated members)

CAG abstract

Write a short abstract of the CAG in English. This is to give the evaluation panel an overview of the applications main theme and goal.

[Up to 2000 characters including spaces]

CAG abstract - Norwegian

Write a short abstract of the CAG in Norwegian. The abstract should address the general public and not scientists, and will be used for public announcements of the selected CAGs.

[Up to 2000 characters including spaces]
